🔗 [Linkedin : EL MOUATAZ BENMANSSOUR](#) 📍 Indonesia 🇲🇴 Moroccan

SUMMARY

Third-year Informatics Engineering student with hands-on experience developing and shipping full-stack applications through software engineering internships, personal projects, and university work.

Experienced with TypeScript, React/Next.js, Python/Django, Laravel, REST APIs, PostgreSQL, Docker, and LLM-powered workflows. Seeking an international software engineering opportunity to build reliable production systems.

EXPERIENCE

Full Stack AI Agentic Engineer Intern

[School.how](#) | [Remote](#) 📅 07/2026 - Present 📍 United Kingdom

School.how | Remote

AI-powered education technology company developing learning, tutoring, and course-generation products.

- Develop full-stack features across Next.js and Laravel, contributing to production frontend and backend systems.
- Contribute to an agentic course-production pipeline for source analysis, course generation, automated validation, QA, and export.
- Test and validate AI-generated content, tutor behavior, retrieval accuracy, and safety guardrails to improve reliability and quality.
- Debug frontend and backend issues, investigate failures, and implement fixes through iterative development and testing.
- Collaborate with an international engineering team using Git-based development workflows, task tracking, code review, and structured QA processes.
- Contribute to automated validation and production-oriented workflows for generating, testing, and releasing large educational course content.

Full Stack Software Engineer Intern

[Joki Proyek](#) 📅 10/2025 - 02/2026 📍 Jakarta, Indonesia

Software development company providing digital solutions and custom web application services.

- Contributed to the development and maintenance of a multi-service platform, working with Docker, PHP (Laravel), and modern JavaScript frameworks.
- Implemented new features, debugged issues, and collaborated with cross-functional teams, gaining hands-on experience with CI/CD pipelines, containerization, and RESTful APIs.
- Designed UI/UX interfaces tailored to project requirements, ensuring usability and functionality.
- Produced technical documentation and reports, improving project clarity and communication.

Full Stack Developer Intern

[Newzar company](#) 📅 01/2024 - 10/2024 📍 Morocco, Tanger

Coffee business focused on providing coffee products and related customer services.

- Developed and maintained full-stack applications using Django/Flask, React/Node.js, and SQL/NoSQL databases.
- Designing responsive user interfaces and improving user experience.
- Collaborating with the team to align technical solutions with business needs.
- Applying problem-solving and creativity in real-world software projects.

SKILLS

Languages

Python, TypeScript, PHP, JavaScript, C, SQL

Frameworks

Django, Django REST Framework, React, Next.js, Laravel,

Databases

PostgreSQL, MySQL, MongoDB, Redis

DevOps & Tools

Docker, Git, GitHub, Linux, CI/CD, Celery, Jira

Core Concepts:

REST APIs, Object-Oriented Programming, Data Structures & Algorithms, Database Design, Debugging, Software Testing

AI & Automation

Generative AI, LLM Integration, AI Agents, n8n

PROJECTS

Mangrove Guardian AI

React, TypeScript, Django REST Framework, PostgreSQL, Celery, Redis, Docker, Gemma 3 · [Demo Github](#)

- Built a full-stack platform for community members to report mangrove damage with photos and locations while organizations track restoration projects.
- Developed an asynchronous **multimodal AI pipeline** using Gemma 3 12B to assess photos and return ecosystem health scores, damage detection, and risk levels with schema validation.
- Secured the API with **JWT authentication, role-based access control, and Redis-backed rate limiting**, with fallback handling for service failures.
- Containerized the application with **Docker Compose**, integrating Django, React, Celery, PostgreSQL, Redis, and Nginx for production deployment.

EDUCATION

Bachelor's in Informatics Engineering

Nusa Putra University

📅 10/2024 - 10/2028 📍 Sukabumi, Indonesia

GPA
3.80 / 4.0

KEY ACHIEVEMENTS

- 

1st Place – CIIC 2026 ASEAN-Indonesia Preliminary Round

Led a multidisciplinary team to **1st Place** in the ASEAN-Indonesia Preliminary Round of the China International College Students' Innovation Competition 2026, qualifying for the **Southeast Asia Division Contest (SEA-CICSIC 2026)**
- 

Bronze Award (3rd Prize) – SEA-CICSIC 2026, Malaysia

Led a multidisciplinary team developing an AI-powered smart rehabilitation solution for hand recovery; coordinated development, pitching, and competition activities, earning a **Bronze Award (3rd Prize)** and **RM 3,000 in prize funding**.
- 

Lead Organizer – Build with Gemma AI Hackathon 2026

Led the organization of a university AI hackathon at Nusa Putra University in collaboration with HMTI, with a **\$2,000 prize pool**.

VOLUNTEERING

Judge – National English Tournament, English Fest 2025

Universitas Nusa Putra 📅 08/2025

Evaluated storytelling participants on creativity, fluency, and presentation, supporting fair and structured competition.

Environmental Volunteer

Mangrove Jakarta Fellowship 📅 03/2026

Participated in mangrove cleaning and cultivation activities as part of a community environmental initiative.

LANGUAGES

- Arabic

PROJECTS

AI Career Memory Assistant

React, TypeScript, Django, PostgreSQL, Celery, Redis, scikit-learn.
[Github](#)

- Built a full-stack platform that imports GitHub repositories and analyzes them against target job descriptions to generate **STAR-format resume bullets, interview questions, and project summaries**.
- Designed a **Django REST Framework API** with JWT authentication and GitHub OAuth, with encrypted GitHub access-token storage using Fernet.
- Implemented **asynchronous repository analysis** with Celery and Redis, including task-status polling to keep the frontend responsive during long-running jobs.
- Integrated a **scikit-learn career-path prediction model** based on users' skills, experience, and academic profile.
- Developed a responsive frontend using **React 19, TypeScript, Vite, and Tailwind CSS**, including automatic JWT token refresh with Axios interceptors.

StudyHub

An English learning platform built with React + Django + PostgreSQL
[Github](#)

- Built a full-stack English learning platform with **class booking, study materials, flashcards, learning goals, and progress tracking**.
- Developed interactive English-practice and grammar-correction features using the **LanguageTool API**.
- Designed separate workflows for students and administrators to manage learning content and activities.
